MVC

PROJECTS

CRS (Computerized Reservations System)

- CRS is used to Promote sales and Provide fast availability, Price and Bookings of Bus tickets.
- It is mainly used by registered Computer who operate right related things.
- Technology: - C#, Asp.Net, Ado.Net, WinForms, MySQL.

BusCRS.com

- It is same as CRS which is used to Promote sales and Provide fast availability, Price and Bookings of Bus tickets.
- But it is web Application which is used by operator.
- Technology: - Asp.Net, Ado.Net, HTML, CSS, Ajax, jQuery, MySQL.

Bookbustickets.com

- It is a web Application which is used to Book a ticket by operator agents like Paytm, Red Bus, Travelyaari .
- Technology: - Asp.Net, Ado.Net, HTML, CSS, Ajax, jQuery, MySQL.

LIT (Lost in Transactions)

- It is a web Application which is used to retrieve data from database and display in application which is failed during transaction or any other reason.
- Through LIT operators can see how many customers has failed to Book tickets so they can ask customer to book tickets again.
- Technology: - Asp.Net, Ado.Net, HTML, CSS, Ajax, jQuery, MySQL.

Auto Delete Seat Wise Fare (Crone)

- It is a console Application which used to delete seat wise fare before departure time.
- Technology: - C#, Ado.Net, MySQL.
